

## **NviroTek Laboratories (Pty) Ltd and Nemlab (Pty) Ltd join forces to improve laboratory services to South African Agriculture**

NviroTek Laboratories (Pty) Ltd, an independent and SANAS accredited laboratory group, is excited to announce the incorporation of Nemlab, a diagnostic laboratory specialising in nematode testing as well as soil and plant health. Nemlab's expertise in aspects of soil biology and plant diseases, compliments NviroTek's wide range of chemical and physical tests of soils, plant material and sap, fertiliser, lime, water, compost and growing media.

According to Dailena Pienaar, managing director of NviroTek Laboratories, the combined strength of both laboratories and the wider geographical footprint enables them to offer more sustainable and comprehensive solutions to Agri customers and producers across Southern Africa from a single, reliable source.

"This transaction will ensure that our customers continue to receive accurate and timely laboratory results that support better decision-making for agriculture and other industries. We are positive about the opportunities the merger offers for both our businesses and our customers," says Pienaar.

### **About NviroTek Laboratories (Pty) Ltd**

NviroTek Laboratories is a South African laboratory group (operating from Hartbeespoort in Northwest and Wellington, Western Cape), which has been offering a wide range of analytical services to the agricultural and food industries for the past 17 years. In addition to the above-mentioned chemistry and physical tests for Agri inputs, accredited MRL and toxin testing, full services for the animal feed industry, as well as hygiene monitoring and microbiological analyses for the food and processing sectors, are on offer.

### **About Nemlab (Pty) Ltd**

Nemlab has been in business for over 35 years as a diagnostic laboratory specializing in nematode testing. Nemlab identifies nematodes present in soil and plant roots and evaluates their potential risks to crops. Nemlab also offers the following services: plant diseases, mycorrhizal analyses, bud mite and insect analyses, pollen viability, bio stimulant testing, pot/greenhouse trials for fungi and bacteria as biocontrol agents and various soil health analyses. The expert services help farmers and agronomists manage soil health and protect their crops. The three laboratories are in: Klapmuts, Upington and KwaZulu-Natal.

## **NviroTek Laboratoriums (Edms) Bpk en Nemlab (Edms) Bpk werk saam om laboratoriumdienste aan Suid-Afrikaanse Landbou te verbeter**

NviroTek Laboratoriums (Edms) Bpk, 'n onafhanklike en SANAS -geakkrediteerde laboratoriumgroep, is opgewonde om die integrasie van Nemlab, 'n diagnostiese laboratorium wat spesialiseer in nematode-toetsing sowel as grond- en plantgesondheid, aan te kondig. Nemlab se kundigheid in aspekte van grond biologie en plantsiektes, komplementeer NviroTek se wye reeks van chemiese en fisiese toetse van gronde, plantmateriaal en sap, kunsmis, kalk, water, kompos en groeimedia.

Volgens Dailena Pienaar, besturende direkteur van NviroTek Laboratoriums, stel die gekombineerde krag van beide laboratoriums en die wyer geografiese voetspoor, hul in staat om meer volhoubare en omvattende oplossings aan veral agri-kliënte en produsente regoor Suider-Afrika te bied vanuit een, betroubare bron.

“Dit sal verseker dat ons kliënte steeds akkurate en tydige laboratorium resultate ontvang wat beter besluitneming vir landbou en ander bedrywe ondersteun. Ons is positief oor die geleentheid wat hierdie samevoeging vir beide ons besighede en ons kliënte bied,” aldus Pienaar.

### **Oor NviroTek Laboratoriums (Edms) Bpk**

NviroTek Laboratoriums is 'n Suid-Afrikaanse laboratoriumgroep (bedryf uit Hartbeespoort in Noordwes en Wellington, Wes-Kaap), wat die afgelope 17 jaar 'n wye reeks analitiese dienste aan die landbou- en voedselbedrywe bied. Benewens die bogenoemde chemie en fisiese toetse vir agri insette, bied ons geakkrediteerde MRL en toksiene-toetsing, volledige dienste vir die veevoerbedryf, sowel as higiëne monitering en mikrobiologiese ontledings vir die voedsel- en verwerkingssektore aan.

### **Oor Nemlab (Edms) Bpk**

Nemlab is al meer as 35 jaar in besigheid as 'n diagnostiese laboratorium wat spesialiseer in nematode-toetsing. Nemlab identifiseer nematodes wat teenwoordig is in grond en plantwortels en evalueer hul potensiële risiko's vir gewasse. Nemlab bied ook die volgende dienste aan: plantsiektes, mikorisa-ontledings, knopmyntontledings, insekontledings, stuifmeel-lewensvatbaarheid, biostimulant toetsing, pot-/glashuisproewe vir swamme en bakterieë as biobeheermiddels en verskeie grondgesondheidsontledings. Die kundige dienste help boere en landboukundiges om grondgesondheid te bestuur en hul gewasse te beskerm. Die drie laboratoriums is geleë in: Klapmuts, Upington en KwaZulu-Natal.
